Description

The Lindy Latching SATA Cable is a high-performance, reliable cable equipped with two locking 7 pin SATA connectors, allowing users to connect motherboards with SATA peripherals such as HDDs, SSDs and optical drives. Robust latching mechanisms allow this cable to securely connect to motherboards and peripherals which have the compatible latching mechanisms, providing a reliable internal connection. This cable can also be connected to standard motherboards or devices that don't have a latching mechanism. With full support for SATA III and backwards compatibility with SATA II and I this cable is designed to work alongside the most modern motherboards and storage devices as well as older peripherals.

Specification
